

DL4000-PM: A-B Power Monitor 3000 DF1-Half Duplex to Modbus Interface

The DL4000-PM is a custom interface which is setup to Poll certain files from an A-B Power Monitor 3000 and sends the data to a specified Modbus Slave device and Register range. The DL4000-PM acts as a DF1 Half Duplex Master device to poll the Power Monitor. Translates the data into Modbus RTU and writes the data to a specified Modbus RTU slave device.
